Fleet Management

Global experience in fleet management

Custom Fleet provides an extensive range of fleet management services to complement all vehicle fleets. Whatever the ownership or size of your fleet, Custom Fleet can help you maximise your investment through optimising fleet usage and minimising operating costs.

Working in partnership with you, we will develop performance indicators that will help measure results and ensure we deliver exceptional service. Our aim is simple: to make a positive impact on your bottom line.

Custom Fleet is part of GE Capital. That means our strength in New Zealand is backed by GE's global resources.

How fleet management can help

For a low monthly fee per vehicle, our fleet management services can deliver:

- Real cost reductions due to our purchasing power and market experience
- Reduced administration costs through consolidated invoicing
- Savings from preventative maintenance management systems
- Improvement programs based on our independent advice and expertise, assisting maximised asset performance and functionality
- Meaningful reporting systems to identify issues and practical solutions
- More time to focus on the profitability of your own business

The road to fleet savings

Our Fleet Management Services will help reduce your vehicle costs throughout the life of your fleet by providing:

- **Vehicle maintenance and management** – a pro-active maintenance cost reduction service. Our qualified fleet service representatives ensure only appropriate maintenance and servicing is performed to set guidelines, ensuring vehicle reliability and driver safety. These savings combined with our buying power ensure reduced maintenance costs are passed back to you.
- **Accident & claims management** – a complete service including comprehensive assistance in the event of vehicle accidents. Operating 24/7 throughout New Zealand, this fully outsourced management service reduces motor vehicle repair costs and takes away the hassles normally associated with accidents.
- **Registration management** – the cost of the re-registration is included in all fully maintained operating lease products. For all non-maintained lease products and fleet management services re-registration can be either included in the monthly fee or treated as a charge back item.
- **Management reporting** – we can provide reporting from fleet to individual driver vehicle level on a monthly, quarterly or ad hoc basis. Our internet-based reporting/data access is also available 24/7 online through a secure site. Drivers and vehicles can be moved between cost centres and real time reporting accessed all at the click of a mouse.
- **Accident & breakdown service** – our 24/7 0800 Driver Helpline provides assistance for all drivers from accident or breakdown through to management of claims administration, vehicle repairs and third-party at fault claims.
- **Vehicle acquisition & disposals** – expert service is offered for vehicle acquisition and disposal. This takes away the time-consuming tasks of sourcing the correct vehicle for your company and then trying to sell the vehicle at the end of its useful life.

Other valuable options

Custom Fleet offers several other options to ensure our service is tailored to your fleet's needs, including:

- Leasing options – fully maintained, heavy commercial, finance, nEXt lease
- AutoRisk™ – Custom Fleet's comprehensive vehicle insurance
- Third party reporting
- Driver training
- Relief vehicles

Let's talk about you

If greater efficiency and flexibility sounds appealing we'd like to talk to you
