

# Electrify your fleet with

## EV+

## Thinking about transitioning your fleet to electric, but concerned with the cost?

With **Custom Fleet's EV+ program**, we're offering eligible NZ businesses the opportunity to lease an electric vehicle for the same price as a regular internal combustion engine vehicle. We believe, there's no better way for you to decide whether an EV is fit for your business needs, than trying one out for yourself.

We're proud to be able to support NZ businesses on their journey to sustainability. With the help of a grant from the Government's Low Emission Vehicles Contestable Fund, administered by the Energy Efficiency and Conservation Authority (EECA), we're able to remove some of the cost barriers associated with EVs, to ensure that businesses who want to explore fleet electrification, have the opportunity to do so.

### Accelerating the transition to an electric future

Custom Fleet's full EV+ Program is the complete solution for businesses wanting to get started on their EV journey. Combining both local and global expertise, we have partnered with leading solution providers to offer a range of products and services that will ensure that you can transition your fleet to EVs with ease and simplicity.

**Fleet Analysis** - We start by conducting a full, in depth, strategic review of your fleet to assess your suitability and eligibility for EVs. We'll provide you with an EV strategy that is fit for purpose and in line with your business needs.

**Workplace Charging Infrastructure** - Based on learnings from around the world, the majority of EV charging will occur at work or at home. We can assist in simplifying the deployment of charging infrastructure where you need it, ensuring that the solutions are optimised for your fleet and building, with the future of your investment in mind.

**One stop reporting and cost reconciliation** - We will consolidate all costs associated with your EV on a single invoice, including public charging at leading Charge Point Operators in New Zealand. This provides full visibility to all costs that are associated with your EV.
